

enVision

IoT Platform

Synetica's enVision IoT Platform energy management solution enables businesses to monitor energy usage, make savings and measure environmental impact.

Using the latest web technology, enVision presents data in an easy to understand, graphical format so that users can quickly and simply analyse information from multiple utilities including gas, water, electricity, steam, heat and renewables.

Flexible reporting options ensure that operations and facilities managers are kept informed of ongoing usage trends, energy efficiencies, carbon emissions and up-to-date utility costs.

enVision is available as both a flexible online service or can be installed on site where required. A range of licensing options offers businesses of all sizes choice and flexibility.

Applications

Commercial

Energy

Infrastructure

Retail

Healthcare

Education

Key Features

Real time custom dashboards

Easy, simple data monitoring

Customised, automated reporting

Hosted in ISO 27001 secure data centre

Data analysed from multiple utilities

Works with any vendors logging or metering equipment

enVision IoT Platform

Synetica's enVision IoT Platform provides:

Real Time Custom Dashboards

- Easily create custom dashboards to present data as required to identify issues, reduce waste, verify savings and demonstrate KPIs
- Drill down into information to highlight complex system relationships
- Security profiles allow dashboards to be tailored to specific user requirements

Data Monitoring

- enVision software monitors all incoming data to ensure it is received correctly when expected and that the information is consistent and complete

Custom Automated Reporting

- Powerful automated reporting allows users to regularly schedule, publish and share energy performance to enable tracking and comparison of key parameters

Online Flexibility

- enVision Web is a subscription-based service accessed via a web browser providing users with excellent value and convenience

Data Security

- enVision Web is hosted in an ISO 27001 certified data centre, achieving industry best-practices for information security

Features

Customisable, real time energy dashboards

Downloadable dashboard data straight into Excel®

Powerful customisable reports

Wide range of report templates including daily, weekly, monthly, calendar, heat maps, target, tenant billing & benchmarking

Flexible report scheduling with email distribution

Custom alerts to report on exceptional patterns or anomalies

Constant monitoring of received data with alerts for inconsistent or missing data

Works with any vendors logging or metering equipment

Tightly integrated with Synetica's range of metering and environmental monitoring products

About us

Synetica was established in 2008 with the simple idea to revolutionise air quality monitoring, energy usage and remote asset monitoring. Our global customer base relies on our expertise to help them reduce emissions and clean up the air they breathe by allowing them to monitor their energy usage and key environmental parameters via the touch of a button.
